LUPINE LIGHTING SYSTEMS 2017/18

Prisliste pr. 17/09 2018.

Forbehold for fejl og prisændringer uden yderligere varsel

Info omkring koderne i model navne:

- Batterierne kan hedde **"Hardcase"** eller **"Smartcase"**. Batterierne er opbygget på samme måde, og ser ens ud, men Smartcase har en batteriindicator, som kan vise ladetilstand.
- **"R"** i model betegnelsen betyder **"Remote control"** og betyder at Bluetooth remote er med i pakken
- **"Tal"** i model betegnelsen henviser til batterikapacitet i pakken. - en **"2"** betegnelse kan stå for 2,2 Ah og en **"4"** betegnelse kan stå for 3,3 Ah, så tag det med et gran salt!
- **"X"** i model betegnelsen står for **"pandebånd"** og er primært gældende for **"headlamps"**
- Alle helmets og bikelights levers med hjelm montage beslag. Ønskes styrmontage, så skal der tilkøbes **quickrelease** til styret - i den korrekte diameter, hvorpå lampen monteres

LUPINE SL - SIKKER PÅ SPORET, SIKKER PÅ VEJEN

Det automatiske "dagslys" lys øger din færdselssikkerhed. Med den specielt optimerede styrke regulering, så kan du også udfordre dine cykelfærdigheder om natten, mens du stadig vil kunne opdage enhver forhindring i tide.

SL er en speciel Lupine lampe. Strålemønstret er ikke kun i overensstemmelse med tyske regler, men den kaster lyset 100% fokuseret på din vej. Den virker som forlygter på en bil og er derfor helt blændefri for andre trafikanter. På samme tid, så er hver meter af bremselængden jo vigtig, så derfor er det desto vigtigere at du ses i tide.

SL lampen kører i "dagtime" mode med et ekstremt bred lyskegle og sikrer den bedste synlighed om dagen.

De internationale SL versioner også kommer med en ekstra blinkende indstillingsmulighed.

Er du så hurtigt på din e-bike, at du ikke har tid til at styre dit lys manuelt? Det justerbare stereosensorsystem scanner omgivelserne og skifter selv mellem dagslys funktion og fjernlys funktion.

57194010	1089 - LUPINE HEATSINK BLIKA - improves the performance of Piko at slow movement	149,00

DE FORSKELLIGE LADERE:

Wiesel: Wiesel er lupines basic lader, som har undergået mange udviklingstrin gennem tiderne, og i den aktuelle version lader med 1,2 Ah.

Micro Charger: Small and powerful! - Denne lille micro lader er velegnet til at lade alle vores Li-Ion batterier, og med 2A ladestrøm, så er det en perfekt løsning hvis du er på farten.

Charger One: Intelligent high-end charger! - Med Charger One får du den nyeste teknologi indenfor batteri ladning. Komplet udviklet af lupines ingeniører, så den matcher lupine produkterne perfekt. Softwaren i laderen sørger for at batteriet oplades til maksimum uden at belaste batteriet unødigt. Informationerne i displayet viser status om spænding, ladestrøm og niveau for opladning. Charger One er kompatibel med alle Lupine batterier og lader med 2A, så ingen kan gøre det hurtigere end denne lader.

Piko TL Charger: Piko TL kræver et andet stik end normale Lupine batterier. Er identisk med Wiesel, og har undergået mange udviklingstrin gennem tiderne, og i den aktuelle version lader med 1,2 Ah.

NEO

SMALL LIGHT, LARGE OUTPUT

The Neo is an ideal companion for mountaineering, hiking, running, skiing, or working at night, offering up to 80 hours' operation, amazing 900 lumens, and perfect illumination.

The Neo is the smallest light we've ever built that offers full Lupine technology. It features active heat management, five different lighting modes, numerous additional functions, and high-end, sturdy aluminum housing. The Neo also features a red light to allow you to read maps unobtrusively and a particularly striking appearance. It only weighs 50 grams and you'll barely notice it on your head even after hours of wearing it.

The wide angle of the peripheral light gives you a constant, perfect view of your surroundings. The narrow central spot offers an excellent range of more than 160 meters and the included diffuser provides a noticeably gentler light when needed.

PIKO

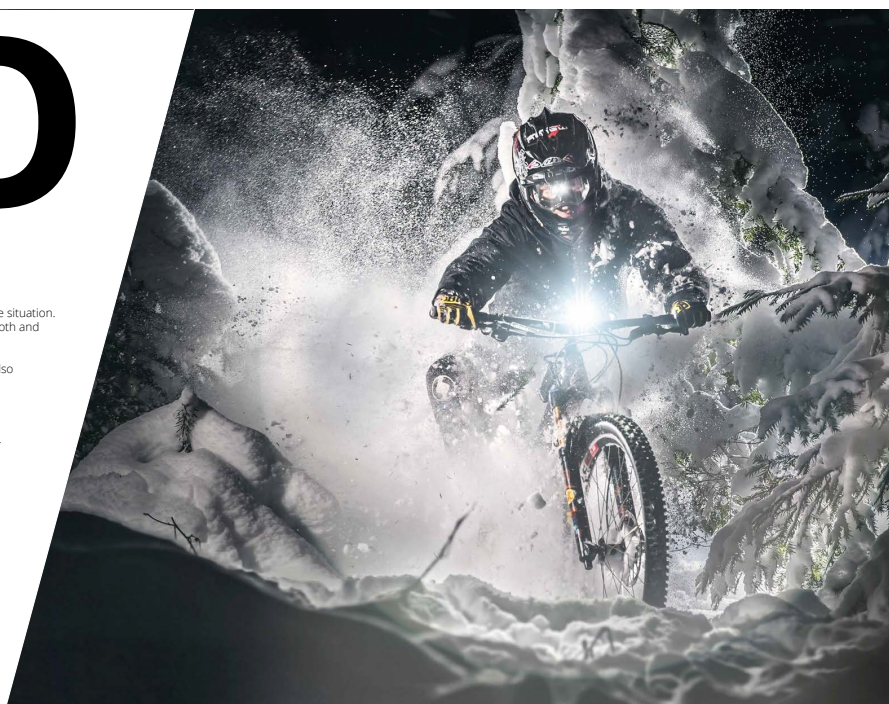

SMALL HIGH-TECH MIRACLE

The Piko is extremely small and light, but also robust and bright enough for any extreme situation. Piko offers 1800 lumens in a light that's no bigger than a matchbox and optional Bluetooth and remote control connectivity.

A headlamp so compact that you can comfortably wear it for hours on your head, but also bright enough for even the most extreme conditions and fast downhill runs: that's Piko. The latest generation sends out an incredible 1800 lumens and weighs just 65 grams. No other light this size has such a high output.

The Piko headlamp allows you to choose between five pre-programmed lighting modes. With just a single touch of a button, you can easily switch between 2-stage, 3-stage, 4-stage, ECO, and RVL mode. You also have additional functions such as SOS and Alpine emergency signal.

PIKO FRONTCLICK

With the FrontClick quick-change system, your lighting will be more flexible than ever before. You can turn your headlamp into a helmet lamp or swap your headlamp from one helmet to another safely, quickly, and without tools. Just click into place onto the plate attached to your helmet with a special 3M adhesive pad or the tried and tested Lupine velcro system.

From mid August 2018 all Piko and Blika helmetlights with 3.5 Ah battery, will be delivered with FrontClick mount and FastClick battery.

BLIKA

A LIGHT FOR EVERY ADVENTURE

There are lights for running, lights for climbing, lights for biking, and then there's one that works for any of your adventures. A massive 2100 lumens, near and high beam, red and green light, a gentle reading light, and the brand new FrontClick system make the Blika the most versatile Lupine we have ever constructed.

In developing the Blika, we asked ourselves what a light would need in order to do as much as possible at night. Starting with the popular Piko light, the Blika has a switchable, narrow spot and thus increases its range by a multiple. Red and green lights allows very specific applications and the diffuse reading and camping light is perfect in case you need it for more gentle action.

To make using the Blika as straightforward as possible, we have designed a new operating system with two buttons that you can assign as you like. This gives you instant access to all levels of lighting and special functions that you need at the moment.

2-WAY BUTTON

Double the buttons = double the possibilities. With the 2-button Bluetooth remote control for the new Blika, you can now switch even more easily between lighting levels and special functions. You can choose between two different operating concepts. Switch the lighting levels as quickly as you shift gears or use one of the buttons for the main light and the other for direct control of special functions such as red or green light.

BLIKA FRONTCLICK

With the FrontClick quick-change system, your lighting will be more flexible than ever before. You can turn your headlamp into a helmet lamp or swap your headlamp from one helmet to another safely, quickly, and without tools. Just click into place onto the plate attached to your helmet with a special 3M adhesive pad or the tried and tested Lupine velcro system.

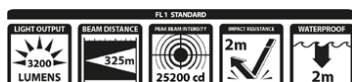

WILMA

NIGHT CHANGER

With 3200 lumens, you will notice even the fastest movements in the dark and any stumbling block that might trip you up in even the most challenging of circumstances. The Wilma Helmet light: also available with Bluetooth and remote control operation.

What have you always wanted to do after dark? The Wilma makes it possible. An incredible 3200 lumens makes Wilma R even brighter than conventional car headlights. So much output and perfectly balanced illumination enable you to undertake any fast, extreme, or challenging activity even at night.

The Wilma headlamp offers 10 different dimming levels and numerous additional functions such as SOS, FLASH, RVLr and Alpine emergency signals.

BETTY

A FLOODLIGHT FOR YOUR HEAD

Switch it on and you'll be blown away by the 5000 lumens coming off this attractive, yet rugged light in aluminum housing. Features Bluetooth and remote control operation, a special lens arrangement for perfect illumination and enough output to flood entire valleys in light. That's Betty R for you.

In order to build the brightest helmet light of its kind, we first questioned everything that goes into a headlamp: a sturdy, yet super lightweight housing, powerful LEDs, an effective lens system and easy operation. With Betty, we wanted the best for each of these aspects. So we redefined the limits of technology and created something special. A light without compromise.

There are 11 different dimming stages and numerous additional functions such as Centre-LED, SOS, FLASH, RVLr and the Alpine emergency signal.

ALPHA

THE NEW MAXIMUM

The new Lupine Alpha is nothing less than the most powerful bicycle lamp for racing, we've ever built. Full 7200 lumens, perfect illumination and an enormous range of up to 840 meters make your bike the ultimate nighttime racing machine.

Whether directly in front of the front wheel or several hundred meters away: the Alpha will show you every detail on your trail. The Alpha combines 3 different lens types to create a perfectly illuminated image tailored for racing use. Two 22° lenses in combination with two ultra-wide angle lenses ensure a never-before-seen illumination at close range. Four 18° lenses focus some part of the light and generate a range that outshines any comparable lamp.

LUPINE LIGHT CONTROL 2.0

The new app for Blika and Alpha allows you to do even more, such as assigning lighting levels and special functions to any button of your choosing. Save your settings, create custom profiles for your activities, and simply use them when you need them again. This way you'll be set to go for each of your sports: just select the profile you created and light up.

LED STATUS BAR

During the fastest passages you can immediately see at what level your lamp is currently set. The Alpha has an extra large, colored LED status bar for displaying light levels and selected functions.

APP

With the App you assign the light levels and special functions. Save your settings, create custom profiles for your activities, and simply use them again when you need them again. This way you'll be set to go for each of your sports: just select the profile you created and light up.

ALPHA BATTERY

The battery on the Alpha has been specifically designed for the high performance usage. Software and the control board hardware have been optimized. In addition, the capacity indicator now shines blue.

BLUETOOTH

Control your lamp with a remote control in your hand or directly from the handlebar, all without wires and without any delay. All lamp models with an "R" in the name feature BLUETOOTH and remote controls.

LUPINE LIGHT CONTROL

Lupine Light Control 1.0* connects your Piko, Wilma or Betty to your phone. But the app is far more than just a high-end remote control. It revolutionizes the setting of lighting levels: with just a few swipes, you determine how strong you want your light to shine for each level, add further levels, or use various special functions.

* for iOS and Android

ROTLICHT

INTELLIGENT SAFETY LIGHT

Riding in a group and need to brake? The red light reacts immediately with a brake light.

On the road and a car's light hit you? The red light detects how much light there is around you, and also save power when you need less output.

As you'd expect from Lupine, the red light offers an impressive 160 lumens and perfect craftsmanship. The high-quality aluminum housing and robust polycarbonate front cover are extremely rugged and reliably protect your red light from bumps, dust and water.

ROTLICHT TAILLIGHT

FAST AND SECURE

The holder can be applied quickly, easily, and securely to handlebars between 22 and 55 mm (7/8 to 2 1/8 inches) in diameter.

DATA	ROTLICHT
LUMENS (ANSI)	160 LUMENS
POWER	0.1 - 2 WATT
BATTERY	830 mAh
RUNTIME	1h 30 - 80h
LED	1 x Cree XP-E2
BEAM ANGLE	180°
WEIGHT	55g

BRAKELIGHT - When you pull on the brakes, the built in acceleration sensor turns the light brighter to gain more attention on the streets.

BRIGHTNESS SENSOR - Automatic light adjustment depending on the ambient light. If for example a car comes closer, the light turns brighter.

ACCESSORIES

SEAT STAY MOUNT

The seat stay mount ensures secure attachment that needs minimum space. With just one click, you can release your Rotlicht from the holder to charge it or protect it from theft when you park your MTB.

BAROLO KIT

For lovers of the classic red look, the Barolo kit gives your Rotlicht a touch of nostalgia.

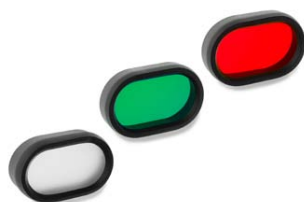

PIKO TL FLASHLIGHTS

MAX PERFORMANCE, MINIMUM SIZE

Piko TL (PTL) offers maximum performance with a minimum size and a design that has been popular for years, with even more output than before. The compact, lightweight flashlight is made of black anodized aluminum, fits perfectly into your hand, and shines through the deepest darkness with a fantastic 1500 lumens.

The PTL is a high-tech flashlight, smaller than your phone and perfect for your pocket. 2 high-power LEDs set the PTL ablaze with up to 1500 lumens, bright enough to provide enough light in any nighttime situation. To make the Piko TL as durable and lightweight as possible, we rely on a particularly high-quality aluminum body and a head element milled from a single piece of metal.

We designed every single millimeter to meet the highest demands on technology and design to create a new type of flashlight that's extremely powerful and extremely compact.

DIFFUSOR

The diffusor provides a soft light and is a useful accessory for activities like climbing, photography or at the camp fire.

FILTER

The filters for our Piko give the night alternatively into a green or red light.

BETTY TL 2 FLASHLIGHTS

A FLOODLIGHT IN YOUR HANDS

The BTL is your hand-held floodlight. Easy battery change, a sturdy, but beautiful aluminum case and up to 5000 lumens make the Betty TL the perfect flashlight.

A lightweight, but sturdy aluminum housing, a special lens arrangement for perfect illumination and enough output to flood entire valleys in light. In addition, a red light is integrated for special applications such as videography or photography. Our Betty flashlight is the absolute pinnacle of handheld lighting technology.

With the 1/4 inch thread adapter, you can mount the BTL on all customary tripods or with a flash slot adapter even directly onto your camera.

Its 55 mm thread cover allows you to use a diffusor for a softer light or commercially available photo filters.

BETTY TL 2 PRO FLASHLIGHTS

HIGH POWER LED FLASHLIGHT WITH DOCKING STATION

Far from civilization, you want a light that will do what it promises: Water, scratch and impact resistant, 9.9 Ah battery tank and a massive 5000 lumens.

The unique orbital charging technology and the docking station with 1.5 amps of charging power ensure you always have a fully powered flashlight. Colored LEDs show the current charge level and help you to find your lamp in the dark. The light itself is held in place by two low-wear spring systems which keep it in place even when things get rough. It can also be mechanically secured with a locking mechanism. The BTL2 Pro System is perfect for vehicles prone to strong vibrations.

An extra thick hard anodized surface (100 microns) and the unbreakable AF front glass protect the lamp head from knocks, bumps, dirt and water. The grooves on the outside of the extra-large battery tanks deliver optimal handling and grip, even if your lamp falls in the mud. This flashlight was developed in response to a special request from the Norwegian police.

SL

SAFE ON THE TRAIL, SAFE ON THE ROAD

Your automatic "daytime running light" increases your road safety. With its specially optimized illumination, you can put your riding skills to the test at night while still recognizing every obstacle in time.

The SL is a special lupine. The beam pattern is not only compliant with German highway regulations, but also throws 100% of its light directly onto your path. This works like the headlights on a car and is therefore absolutely glare-free for other traffic users. At the same time, every meter of braking distance matters. Therefore, it's all the more important to be seen in time. The SL daytime running light radiates extremely wide and ensures best visibility by day. The international SL versions also come with an additional blinking mode.

Are you up and moving with your e-bike so fast that have no time to control your light manually? The adjustable stereo sensor system scans your ambient light and decides in time between daytime running lights and headlights.

SL

SL WITH HIGH BEAM

From October 2018 all existing SL versions will be also available with highbeam.

SL B BOSCH

Suitable for: Bosch Active, Performance, CX drive units
Not suitable for: Bosch Classic Line

12 V mode	900 Lumens
6 V mode	500 Lumens
Full beam	16 Watts Max.
Daytime running light	1.6 Watts
Beam distance	250 m

The SL detects the input voltage of 6 V or 12 V and automatically adjusts its performance.

SL S BOSCH (PURION)

Suitable for: Bosch Active, Performance, CX drive units with Purion Display
Not suitable for: Bosch Classic Line

12 V mode	900 Lumens
6 V mode	500 Lumens
Full beam	16 Watts Max.
Daytime running light	1.6 Watts
Beam distance	250 m

The SL detects the input voltage of 6 V or 12 V and automatically adjusts its performance.

SL S YAMAHA

Suitable for: PW-X und PW-S Pedelec drives since model year 2017
Not suitable for: older models, because the light output of the drive does not provide sufficient power.

6 V mode	500 Lumens
Full beam	9 Watts Max.
Daytime running light	1.6 Watts
Beam distance	140 m

SL S SHIMANO

Suitable for: Steps E8000 drive units
Not suitable for: older models, because the light output of the drive does not provide sufficient power.

6 V mode	700 Lumens
Full beam	12 Watts Max.
Daytime running light	1.6 Watts
Beam distance	200 m

SL S BROSE

Suitable for: Brose Drive S
Not suitable for: older models, because the light output of the drive does not provide sufficient power.

6 V mode	700 Lumens
Full beam	12 Watts Max.
Daytime running light	1.6 Watts
Beam distance	200 m

SL A

FOR EVERY BIKE

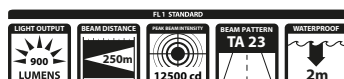

You don't have a suitable E-Bike or don't want to run your lamp on a bicycle without a motor? The SL is also available as a independent version with separate battery.

SL A: That's glare-free 900 lumens, sensor controlled „daytime running light“, operation on the lamp head and proven Lupine batteries.

Manual mode	Daytime-/nighttime running light
Automatic mode	Sensor controlled
Beam pattern	TA23 (Cut-off line)

Light output:

		Runtime: SL A 4	SL A 7
16 W	900 Lumens	1.5h	3h
8 W	500 Lumens	3h	6h
1.6 W	Daytime running light	16h	32h

SL A 7 with 6.9 Ah battery

SL A 4 with 3.5 Ah battery

NEW

SL AF

Who does not like to operate the cars high beam switch on a clear road in the dark, and maybe even accelerate a little bit? With the new SL F you can switch between high and low beam and in high beam mode, even 1200 lumens illuminate the way. The activated high beam is indicated by a blue glowing SL logo in the lamp head and the familiar high beam symbol at the switch.

Light Output	High Beam: 1200 Lumens, Low beam: 800 Lumens
Power	16 W Max.
Manual mode	Daytime running light, Low beam, High Beam
Automatic mode	Sensor controlled
Operation	At the remote control or lamphead
LED	12x Osram Compact CL, 6x Luxeon Z
Lens System	Dual Aspheric Lens System
Dimensions LxBxH	49x50x48 mm
Protection Class	IP68
Beam pattern	TA23 (Cut-off line)

FACTS

BATTERIES

Each of our Li-ion batteries is absolutely watertight and is protected against external forces with an extremely rugged outer case made of ABS plastic. The integrated switch-off electronics on every Lupine battery reliably protects it against faulty currents.

FASTCLICK

With just one click, you can attach your battery to your headband, helmet, or bike frame. The latches of the FastClick batteries keep it securely in the battery holder even when the going gets tough.

SMARTCORE

The optional SmartCore technology offers even more. Color LEDs and an acoustic signal will show you with just the push of a button how much power is left in your battery. The additional running lights and tail light functions increase your visibility and safety.

BATTERY FRAMEMOUNT

Whether it's a FastClick frame holder or straps: you can also attach all of our batteries directly to your bike frame.

HEATSINK BLIKA

The optional heatsink improves the performance of your Blika. Especially at lower cooling by warm ambient air or lack of airstream, your Blika remains longer at its maximum performance level significantly.

Perfect for using indoor or for activities without movement.

QUICK RELEASE MOUNT

With our quick release mount, you can quickly attach your headlamp onto any bar of your bicycle. Your light remains freely adjustable horizontally, but safe and secure in its position.

GOPRO ADAPTER

The Lupine GoPro adapters are ideal for mounting our headlamps to a wide variety of surfaces. If you already own a helmet camera with a suitable holder, this is the ideal holder for your Lupine.

HELMET MOUNT

Our wide assortment of helmet holders guarantee a secure hold on almost every helmet. The headlamp is securely fixed to the helmet holder with two screws. It remains horizontally adjustable without loosening during the ride.

HEADBAND

Our headband is feather-light and can be worn comfortably and safely, thanks to the flexible textiles. The bands are woven in Austria and sewn in Germany with the lamp holders and backs.

HD-HEADBAND (IMPROVED VERSION 2018)

Jumping? Racing? Rough slopes? No matter how extreme your activity is, our Heavy Duty Headband offers maximum support in any situation.

WATER- AND IMPACT RESISTANCE

All Lupine headlamps, flashlights and batteries meet the IP68 and IK09 standards for water- and impact-resistance.

USB ONE

SIMPLE AND BRILLIANT

The USB One turns your Lupine battery into a mobile power bank. Nearly every USB device can be recharged within a very short time.

Lupine battery	Smartphone	Tablet	GPS-Navigation
3.3 Ah	3 - 4 x	0.5 x	4 - 6 x
6.6 Ah	6 - 8 x	1 x	8 - 12 x
13.2 Ah	12 - 16 x	2 x	16 - 24 x

USB CHARGER

CHARGE VIA USB

With the USB Charger, you can charge your Lupine batteries easily via a mobile phone power supply, solar panel, or the USB port of your PC.
